Do your legacy formulary tools tell the real story of what patients pay for access to your products?

HealthPlan*View*

Assessing the true drug cost burden to patients and payers

HealthPlanView's web-enabled portal provides visualizations of patient and plan costs using payer, detailed plan benefit design and cost information.

- Treatment initiation and continuation cost detailed across all plans considering all benefit design variables
- Insured lives at the parent and individual plan level
- Updated with 2020 formulary data and benefit designs
- Medical benefit and pharmacy formulary policies
- Flexible expansion - new products, formulary updates, plan and benefit designs added upon request

Robust, proprietary platform includes
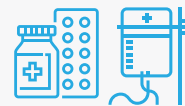

25,000 Commercial plans across **290** insurers → **99.2%** of Commercial lives

3,700 Medicare plans across **250** insurers → **100%** of Medicare lives

63 drug classes in **12** therapeutic areas

A NEXT-GENERATION SOLUTION REPLACING LEGACY FORMULARY TOOLS

LEGACY Formulary Tools

Basic drug benefit details by plan:

- ✔ Formulary tier
- ✔ Preferred/Non-Preferred status
- − PA or step edit - yes or no

Formulary tier is no longer a proxy for favorable or unfavorable access. The evolution and variation in plan benefit designs have left legacy formulary tools lacking insight.

HealthPlan*View*

Complex benefit design details across all plans:

- ✔ Formulary tier
- ✔ Preferred/Non-Preferred status
- ✚ PA requirements
- ✚ Step edit details

- ★ Medical and pharmacy deductibles
- ★ Out-of-pocket maximums
- ★ Cost sharing (specific to therapeutic type and administration)
- ★ Copays and coinsurance

**Total cost to patient
Total cost to plan • Total cost of therapy**

Intuitive interface with granular analysis

Accessible from any devices

Filters to refine search

Comparison between plans

Review therapeutics by drug class

Customizable expansion to additional therapeutic areas

Actionable reporting

Regularly updated formularies based on P&T schedules
